-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to communications: Response to Restriction practice, said Response filed 11/6/2006, to the original application filed 2/24/2004. IDS filed 3/17/2004.
2. Claims 1-21 pending. Claims 1-5, 11-16 have been withdrawn as per Response to Restriction practice. Claims 6-10, 17-21 are presented for examination on the merits, of which claims 6, 17 are independent.

Election/Restrictions

3. Claims 1-5, 11-16 (Group I) are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/6/2006.

Applicant's election with traverse of said claims 1-5, 11-16 in the reply filed on 11/6/2006 is acknowledged. The traversal is on the ground(s) that non of the claims uses the terms "graphical user interface", "presentations", "devices" or "workstations", etc. (page 10 of Response). This is not found persuasive at least because of the following:

Representative claim 1 recites in pertinent part - arranging a "topology" of nodes into a compact layout. A topology is generally referred to as the topographic study of a particular place (or items etc.), and is therefore closely intertwined with graphic presentation of feature differentiations. Accordingly, Group I claims are substantially directed to at least topology of workstations.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. **The claimed invention is directed to non-statutory subject matter.**

In regard to independent claim 6, said claim appears not to be directed to at least a concrete and tangible result. Said claim deals with searching, repeating, and positioning, but the examiner does not see where the claimed limitations direct the invention to a concrete and tangible result. According, said claim is directed no non-statutory subject matter.

In regard to dependent claims 7-10, each of said claims are rejected for fully incorporating the deficiencies of their respective base claims.

In regard to independent claim 17, said claim recites a computer readable medium having computer executable instructions, and also recites logic, which is directed to data structures, therefore said claim is directed to non-statutory subject matter.

In regard to dependent claims 18-21, each of said claims are rejected for fully incorporating the deficiencies of their respective base claims.
